Top 5 vs Bottom 5 Products — Profit Margin %

Business Questions This Page Answers

- Which products generate the highest profit margins?
- Are discounts undermining profitability across categories?
- Which categories/brands need strategic attention?
- How does pricing strategy differ by segment/region?

AI-Driven Recommendations

- Cap discounts at 20% for Electronics to protect margin
- Increase shelf space for high-margin accessories
- Review bottom 5 product pricing or discontinue
- Launch upsell campaigns for Premium Brand segment

Key DAX Measures

Profit Margin % = $\text{DIVIDE}([\text{Gross Profit}], [\text{Revenue}])$

YoY Revenue = $\text{[Revenue]} / \text{[Revenue PY]} - 1$

Discount Impact = $\text{SUMX}(\text{Orders}, [\text{Discount}] * [\text{Sales}])$

Revenue PY = $\text{CALCULATE}([\text{Revenue}], \text{SAMEPERIODLASTYEAR}(...))$

Running Revenue = $\text{CALCULATE}([\text{Revenue}], \text{DATESYTD}(...))$

Segment Benchmarks

Segment	Avg Spend	Churn	Top Cat
Corporate	18.4K	4.8%	
Consumer	9.2K	9.1%	
Home Ofc	12.8K	6.2%	

Business Questions This Page Answers

- Who are our highest-value customers by segment?
- Which customers show early signs of churn?
- Which segments and tiers drive the most revenue?
- What payment methods do top customers prefer?

Customer DAX Measures

Customer LTV = SUMX(RELATEDTABLE(Orders),[Sales_Amount])
Churn Risk Score = IF((Days Since Order)>90, 'High', 'Low')
Repeat Customers = CALCULATE(DISTINCTCOUNT([Cust_ID]),...)
New Customers = CALCULATE([Cust Count], [First Order] = MAX(Date))
Avg Spend per Cust = DIVIDE((Total Revenue),[Unique Customers])

Retention Strategy

- Launch loyalty rewards for Platinum & Gold tiers
- Win-back campaign for High Churn Risk cohort
- Personalise offers based on preferred category
- Upsell Corporate segment to higher AOV products

Restock Alerts

Product	Current Stock	Alert Threshold
Sony PS5	95u	5u
GoPro 12	120u	8u
Dyson V15	140u	12u
iPad Pro	180u	14u
Canon EOS	240u	18u
Samsung TV	280u	19u

Business Questions + DAX

- Which products are bestsellers but running low on stock?
 - Which products generate high profit but low visibility?
- DAX: Low Stock = CALCULATE([Products], [Stock Units] < 20)
- DAX: Bestseller Rev = CALCULATE([Revenue], [Bestseller]="Yes")
- DAX: Avg Rating = AVERAGE(ProductMaster[Avg_Rating])

Inventory Management Insights

- Apply ABC analysis: A=Electronics (top 20% SKUs = 80% revenue)
- Set reorder triggers at 15 units for Electronics, 30 for Clothing
- Bundle low-stock bestsellers with slower items to drive velocity
- Integrate real-time stock alerts into Power BI with auto-refresh

SLA Performance Tracker

Business Questions This Page Answers

- Which regions consistently breach delivery SLAs?
- Does slower delivery directly reduce customer ratings?
- Which categories have disproportionately high return rates?
- What is the shipping cost as % of revenue by region?

Operations DAX Measures

Avg Delivery = AVERAGE(Orders[Days_to_Deliver])
Return Rate = DIVIDE([Returned Orders],[Total Orders])
SLA Breach % = CALCULATE([Orders],[Days_to_Deliver]>4) / [Orders]
Shipping Cost % = DIVIDE([Total Shipping],[Total Revenue])
Rating vs Delivery = CORR([Cust_Rating],[Days_to_Deliver])

Operational Improvements

- Partner with faster courier for East region
- Introduce express shipping tier for Electronics
- Proactive SMS updates to reduce cancellations
- Root-cause Clothing returns — size guide needed
